

I understand that this docket is proposing to give LPFM a higher priority over the current FM translator service. I have been donating funds to the KLOVE radio station to help support my local area and those of hundreds of other local communities to help promote a Positive and Encouraging society. This FM radio station has been broadcasting for many years and has changed the lives of thousands of thousands of people. I believe that a commercial free radio station has a much larger impact on its listeners than a traditional radio station that relies on commercials to fund its existence. If the community can fund a radio station that spans from coast to coast of the United States, than it must have a large following impacting a lot of people. KLOVE receives in excess of 120,000 prayer requests annually from across the United States. This radio station is unlike any other radio station across the United States. The radio personalities are truly gifted with the Positive and Encouraging mentality. Please reconsider this proposal and help to preserve the broadcasting of KLOVE.

Thanks,
Cary Hatteberg
